Successful Collaborations include:

1. Training and Placement plan - Training process to move from the conventional philosophy to today's corporate requirement in other words from chalk and duster to practical and application process.
2. Designing of short term models which will have direct impact on placements
3. Redesigning of Teaching Process- Introduction and implementation of MBO and DISC profiling for students.
4. MDP and EDP with Foreign Certifications – Collaboration with International Companies and Universities for activity based learning.
5. University Partnership Program with IIM-B - Working on University partnership program with IIM-B and use all collaterals for the up gradation of your University under the fusion program.

A strong believer that the future of any market initiative will be based upon fusion of opportunities to create deliverables as desired by the market-place and it is imperative that the businesses and the Team members at every level of management, production and marketing need to understand and imbibe the thought by integrating the same into their DNA, Work Culture and develop the Fusion into best practices.
